## 2.

Wash! Wash! Wash your hands! Wash often with soap and water for 20 seconds (as long as it takes to sing the “Happy Birthday” song twice), especially after sneezing or coughing. If you can’t get to a sink with soap, clean hands with 60% alcohol-based hand cleaner.

## 6.

If you are sick with flu-like symptoms stay home or in your room for at least 24 hours after there is no longer a fever (100 degrees Fahrenheit or 38 degrees Celsius) or signs of a fever (have chills, feel very warm, have a flushed appearance, or are sweating). This should be determined without the use of fever-reducing medications (any medicine that contains ibuprofen or acetaminophen).

Staying away from others while sick can prevent others from getting sick too. Ask a roommate or friend to check up on you and to bring you food and supplies if needed.

# 7.

If you are at higher risk for flu complications (pregnant women, people who have chronic medical conditions such as asthma, diabetes, or heart disease, children under the age of 5 years and people age 65 years and older) you should immediately consult with your health care provider if you develop flu-like symptoms or have been in close contact with someone who has flu.

## 8.

Notify the appropriate department in the event that you or someone close to you has been diagnosed with influenza, so that the College can effectively monitor our community's situation and maintain emergency preparedness.

Students: Inform the Dean of Studies office at x42024 and the Primary Care Health Service at x41FLU (as well as your parent or guardian)

Faculty: Inform your department chair

Staff: Inform your supervisor
