Implementation

1. Find a fiscal sponsor (Student Health Services) to open a university account to order the machine, place orders for emergency contraceptives, and store revenue from the machine. This is particularly important because in MA, you need a medical license to bulk order emergency contraceptives.
2. Open a financial account with the university to purchase the vending machine/product. This account will also be used to store revenue from vending purchases to be used for restocking.
3. Establish relationship with University Vending Services to find a location and delegate stocking responsibilities.
4. Buy vending machine and bulk order emergency contraception at wholesale price.
5. Stock vending machine and secure access to sexual health resources on campus!
