

NCHA III Codebook

Revised 12/16/2020

The ACHA-NCHA III is currently available only as a web-based survey. Schools using the ACHA-NCHA Paper Survey will continue to use the NCHA II until further notice. Unfortunately, many of the enhancements made to the NCHA III (especially those using display and skip logic to improve the respondent experience) do not translate simply to a paper survey format. ACHA will be addressing options for the paper survey over the next year.

National College Health Assessment

The ACHA-NCHA asks about various aspects of your health and is completely voluntary. You may skip any question you do not want to answer. You may complete the survey in multiple sessions. This survey link is unique to you. You may begin the survey on one device and continue where you left off on another device. Use the buttons at the bottom of the survey to navigate through the survey. Do not use your browser's back button. The survey is confidential. When you hit the "Submit Survey" button on the last page of the survey, the link between your email address and your survey responses is destroyed.

By clicking the 'Begin Survey' button below, you agree that:

- the purpose of this study has been thoroughly explained to you;
- you are at least 18 years of age;
- and you consent to participate in the survey.

If you would like to talk with someone about the issues addressed in this survey, you are encouraged to reach out to the campus contact or local resources identified in your survey invitation or to contact one these [national resources](#).

Demographic Characteristics

This part of the survey will help us understand your personal characteristics. There may be limitations to the response options provided, and the response categories offered may not represent your full identity nor use the language you prefer. We care about all identities and experiences and ask that you indicate which choice best describes you.

N3Q67A What sex were you assigned at birth?

- Female (1)
- Male (2)
- Intersex (3)

N3Q67B Do you identify as transgender?

- No (1)
- Yes (2)

N3Q67C Which term do you use to describe your gender identity?

- Woman or female (1)
- Man or male (2)
- Trans woman (3)
- Trans man (4)
- Genderqueer (5)
- Agender (7)
- Genderfluid (8)
- Intersex (10)
- Non-binary (9)
- My identity is not listed above (please specify) (6) _____ N3Q67CTEXT _____

Notes on recoding N2Q67C:

- Students who select “my identity is not listed above” (6) on N3Q67C and indicate a cisgender response for N3Q67CTEXT are recoded either female (1) or male (2) for N3Q67C.
- No additional recoding is done for N3Q67C.
- Students original text responses in N3Q67CTEXT remain unchanged in the data file. To identify cases recoded by ACHA, look for responses in N3Q67CTEXT that have a code other than 6 in N3Q68.
- You may choose to adopt different recoding rules in working with this data and are encouraged to document those rules.

N3Q68 What term best describes your sexual orientation?

- Straight/Heterosexual (9)
- Bisexual (2)
- Gay (3)
- Lesbian (4)
- Pansexual (5)
- Queer (6)
- Questioning (7)
- My identity is not listed above (please specify) (10) N3Q68TEXT

Notes on recoding for N3Q68:

- Students selecting “my identity is not listed above” (10) and specifying Asexual, Ace, or Aces in N3Q68TEXT are recoded Asexual (1) for N3Q68.
- Students selecting “my identity is not listed above” (10) and specifying “straight” in N3Q68TEXT are recoded Straight/Heterosexual (9) for N3Q68.
- Students who indicate more than one sexual orientation in N3Q68TEXT are NOT recoded.
- No additional recoding is done for N3Q68.
- Students original text responses in N3Q68TEXT remain unchanged in the data file. To identify cases recoded by ACHA, look for responses in N3Q68TEXT that have a code other than 10 in N3Q68.
- You may choose to adopt different recoding rules in working with this data and are encouraged to document those rules.

SCHOOLID is a variable used to identify cases coming from the same institution within a given survey period.

HT_INCH height in inches

WTKG weight in kilograms

Estimated Blood Alcohol Concentration (BAC) is based on the reported number of drinks consumed the last time they “partied” or socialized (N3Q26), their approximate length of time of consumption (N3Q26), sex (N3Q67A), weight (N3Q71), and an average rate of ethanol metabolism (.015 g/100mL/hour.) BAC is a continuous variable.

RBAC1 collapses the continuous variable, estimated BAC, into a categorical variable where (1= YES) for those students with an estimated BAC under 0.08% the last time they “partied” or socialized.

RBAC2 collapses the continuous variable, estimated BAC, into a categorical variable where (1= YES) for those students with an estimated BAC under 0.10% the last time they “partied” or socialized.

Estimated Body Mass Index (BMI) is based on self-reported height (N3Q70A and N3Q70B) and weight (N3Q71) and is a continuous variable. The calculation for computing BMI is weight (kg) / [height (m)]².

RBMI is the continuous BMI variable recoded into the following categories identified by the World Health Organization:

- (1) BMI <18.5 Underweight
- (2) BMI 18.5-24.9 Healthy Weight
- (3) BMI 25-29.9 Overweight
- (4) BMI 30-34.5 Class I Obesity
- (5) BMI 35-39.9 Class II Obesity
- (6) BMI ≥ 40 Class III Obesity

RSEX* - uses the responses to N3Q67A, N3Q67B, and N3Q67C to create a new variable, SEX AND GENDER. This variable is used to sort respondents into female and male categories in the ACHA-NCHA report documents.

- If a student's gender identity (N3Q67C) is consistent with their sex at birth (N3Q67A) AND the student selects "no" for transgender (N3Q67B), then RSEX is coded as female or male.
- If a student selects "yes" for transgender (N3Q67B) OR their sex at birth (N3Q67A) is not consistent with their gender identity (N3Q67C), then RSEX is coded as non-binary.
- If a student selects "intersex" for sex at birth (N3Q67A), then RSEX is coded as nonbinary even if transgender (N3Q67B) or gender identity (N3Q67C) are missing, with one exception:
 - If a student selects "intersex" for sex at birth (N3Q67A), transgender (N3Q67B) is "no" or missing, and gender identity (N3Q67C) is "female" or "male," then RSEX is coded as female or male, respectively.
- If a student skips any of the three questions used to compute RSEX, then they are sorted as missing, unless they selected "intersex" for sex at birth (N3Q67A).

- (1) Female
- (2) Male
- (3) Non-Binary
- (-9) Missing

****Note that you are under no obligation to use the variable RSEX, and you are welcome to recalculate it using different decision rules if you like. Responses from the original questions N3Q67A, N3Q67B, and N3Q67C remain in the data file for your use.***

PAAERO – uses the responses to N3Q6 and N3Q7 to determine if the respondent met the US recommended guidelines for *only* aerobic physical activity for adults (150 or more minutes per week of moderate aerobic activity, where 1 minute of vigorous activity equals 2 minutes of moderate activity.)

- (1) No
- (2) Yes

PAGUIDE – uses the responses to N3Q6, N3Q7, and N3Q8 to determine if the respondent met the US recommended guidelines for physical activity for adults (at least **2 days** of muscle strengthening activity AND **150 or more minutes** per week of moderate aerobic activity, where 1 minute of vigorous activity equals 2 minutes of moderate activity.)

- (1) No

(2) Yes

HAPAGUIDE – uses the responses to N3Q6, N3Q7, and N3Q8 to determine if the respondent met the US recommended guidelines for physical activity for *highly active* adults (at least **2 days** of muscle strengthening activity AND **300 or more minutes** per week of moderate aerobic activity, where 1 minute of vigorous activity equals 2 minutes of moderate activity.)

(1) No

(2) Yes
