

SHPCCC meeting minutes  
August 19, 2020

In attendance: Blake Flaughner (he/him), Brandy Reeves (she/her), John Laury (he/him), Charlotte Petonic (she/her), Elliott Ruggles (he/him, they/them), Jordan McCann (she/her), Elaine Miller (she/her), Naomi Ninneman (she/her), Christine Kukich (she/her), Joanne Brown (she/her), Robin Mills (she/her)

- Blake reviewed the purpose of the Coalition
  - Said meetings are the third Thursday of each month at 11am EST/8am PST
    - Next meeting September 16 11am EST/8am PST
- Chair-elect election happening now, closing on August 21st
  - Jordan McCann (she/her) is running for the position
  - Currently interim associate director for Health Promotion and Well-Being at James Madison University
- Went through introductions
- Updates
  - Sexual Health Services data report will be released soon for 2018 and 2019
    - 121 health center respondents
  - [Best Practices](#) webinar September 25 2pm EST/11am PST
  - Another webinar in December about sexual health best practices
    - Looking for people who are doing innovative programming and services in COVID. If you would like to present or be highlighted during the webinar, fill out this [form](#)
- Sexual Health Services [survey highlights](#)
  - People assigned female at birth are not being routinely screened for chlamydia (only 1 in 5 being screened)
    - Discussion about how this question is asked on the survey--could depend on the type of visit; how to ask this question to get the information we want
  - 1 in 4 college health centers not prescribing expedited partner therapy despite being legal in state
    - Want/need to figure out why people aren't doing this
    - EPT = if someone tests positive for some STIs, health care providers can treat their partner without having to see them in the clinic
    - John suggested we present on this at a conference--this is how you do it, states where it's legal, what happens if someone has multiple partners. Likely not taught in NP programs, so some people may not know.
      - Joanne said she would be interested in presenting, too
      - Blake suggested this session be the SHPCCC guaranteed session
  - Pregnancy test positivity has continued to decrease
    - 2019 = 2.6%
    - Blake thinks it may have been as high as 6 or 7% in 2010

- Still do not have much data on trans or non-binary students despite health inequities
  - Likely because of the way that sex is reported on labs--labs only collect male/female. Since SHS data is based mostly on sex, limits reporting/data
- Many respondents don't know about their state's Explanation of Benefits (EOB) laws (58.8% didn't know)
  - Important for sexual health because some students may not access sexual health services if EOB will go to parents/family members
  - In California, dependent can call insurance company and request privacy and EOB will be sent to the dependent and not the student
  - Brandy suggested to include this as a conference presentation or webinar. Perhaps in a partnership with the health insurance coalition
- Frequency of 3-site testing can be improved for MSM (almost 2 in 3 reporting doing it)
  - Rectal, oral/throat, penile swabs for STIs
- Open discussion
  - Do you collaborate with clinical and non-clinical professionals in your health center? What are the challenges?
  - Are you doing anything new or innovative for sexual health this fall?
  - How can the coalition support you in your work?
