## Demographics of Participating Institutions

One hundred seventy two US postsecondary institutions self-selected to participate in the Spring 2013 ACHA National College Health Assessment and 131,523 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 123,078 students and 153 schools. Demographic characteristics of the 153 campuses follow:
