Reference Group Data Report

Spring 2013

The ACHA-NCHA II supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Demographics of Participating Institutions

One hundred seventy two US postsecondary institutions self-selected to participate in the Spring 2013 ACHA National College Health Assessment and 131,523 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 123,078 students and 153 schools. **This report includes only data from 96,911 UNDERGRADUATE students at these institutions.** Demographic characteristics of the 153 campuses follow:
