Demographics of Participating Colleges/Universities

Thirty US postsecondary institutions self-selected to participate in the Fall 2005 National College Health Assessment and 16,989 surveys were completed by students on these campuses. For the purpose of this study, only those institutions that used a random sampling technique or sampled a universe such as all 1st year students were included in the analysis, yielding a final data set consisting of 16,832 students and 29 schools. Demographic characteristics of the 29 campuses follow:
