ACHA, the nation's principal advocate and leadership organization for college and university
health, represents a diverse membership that provides and supports the delivery of health care
and prevention and wellness services for the nation's 20 million college students. For more
information about the association’s programs and services, visit www.acha.org, and www.acha-
ancha.org.

Association-National College Health Assessment II: Reference Group
Graduates Executive Summary Spring 2017. Hanover, MD: American College
Health Association; 2017.
Introduction

The ACHA-National College Health Assessment II (ACHA-NCHA II) is a national research survey organized by the American College Health Association (ACHA) to assist college health service providers, health educators, counselors, and administrators in collecting data about their students' habits, behaviors, and perceptions on the most prevalent health topics.

ACHA initiated the original ACHA-NCHA in 2000 and the instrument was used nationwide through the spring 2008 data collection period. The ACHA-NCHA now provides the largest known comprehensive data set on the health of college students, providing the college health and higher education fields with a vast spectrum of information on student health. A revised survey, the ACHA-NCHA-II, has been in use since the fall 2008 data collection period.

Please note the ACHA-NCHA II is not appropriate for trend comparison with items from the original ACHA-NCHA survey. Directly comparing pre- and post-redesign estimates on similar data points, without taking into account the impact of the survey’s redesign, can lead to an erroneous conclusion.

Notes about this report:

1. Missing values have been excluded from analysis and only valid percents are included in this document.

2. Students responding "not applicable" were excluded from several analyses, which are specifically noted throughout this document. This will often explain differences observed between this document and the full data report.

3. A note about the use of sex and gender in this report: Survey responses are reported by sex based on the responses to questions 47a, 47b, and 47c. For the purpose of the ACHA-NCHA report documents, respondents are reported as male or female only when their responses to these three questions are consistent with one another. If students' gender identity is consistent with their sex at birth AND the student selects "no" for transgender, then respondents are designated as either male or female. If respondents select "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as non-binary. A respondent that skips any of the three questions is designated as unknown. Totals displayed in this report include non-binary and unknown students.

For additional information about the survey’s development, design, and methodology, email Mary T Hoban, PhD, MCHES, (mhoban@acha.org), E. Victor Leino, PhD (vleino@acha.org), or visit www.acha-ncha.org.

This Executive Summary highlights results of the ACHA-NCHA II Spring 2017 survey for Reference Group Graduates consisting of 14,311 respondents.
Findings

A. General Health of College Students

- 59.6% of college students surveyed (64.8% male and 57.1% female) described their health as **very good or excellent**.

- 89.0% of college students surveyed (90.3% male and 88.6% female) described their health as **good, very good or excellent**.

Proportion of college students who reported being diagnosed or treated by a professional for any of the following health problems within the last 12 months:

<table>
<thead>
<tr>

Findings continued

B. Disease and Injury Prevention

College students reported receiving the following vaccinations (shots):

- 73.6% reported receiving vaccination against hepatitis B.
- 47.4% reported receiving vaccination against Human Papillomavirus/HPV (cervical cancer vaccine).
- 52.3% reported receiving vaccination against influenza (flu) in the last 12 months (shot or nasal mist).
- 87.1% reported receiving vaccination against measles, mumps, rubella.
- 71.0% reported receiving vaccination against meningococcal meningitis.
- 56.3% reported receiving vaccination against varicella (chicken pox).

Other disease prevention practices reported by college students:

- 65.6% reported having a dental exam and cleaning in the last 12 months.
- 32.8% of males reported performing a testicular self exam in the last 30 days.
- 34.3% of females reported performing a breast self exam in the last 30 days.
- 40.6% of females reported having a routine gynecological exam in the last 12 months.
- 60.5% reported using sunscreen regularly with sun exposure.
- 43.5% reported ever being tested for Human Immunodeficiency Virus (HIV) infection.

College students reported the following behaviors within the last 12 months:

<table>
<thead>
<tr>
<th>Percent (%)</th>
<th>N/A, did not do this activity within the last 12 months</th>
<th>Never*</th>
<th>Rarely or sometimes*</th>
<th>Mostly or always*</th>

</tbody>
</table>

* Students responding "N/A, did not do this activity within the last 12 months" were excluded.
C. Academic Impacts

Within the last 12 months, students reported the following factors affecting their individual academic performance, defined as: received a lower grade on an exam, or an important project; received a lower grade in the course; received an incomplete or dropped the course; or experienced a significant disruption in thesis, dissertation, research, or practicum work; (listed alphabetically):

<table>

### E. Tobacco, Alcohol and Marijuana Use

Reported use versus perceived use - reported use for all students within the past 30 days compared with how often students perceived the typical student on campus used substances within the same time period. The last line of each table combines all categories of any use in the last 30 days.

#### Cigarette

<table>

### Drinking and Driving

- 1.1 % of college students reported driving after having **5 or more drinks** in the last 30 days.*
- 27.9 % of college students reported driving after having **any alcohol** in the last 30 days.*

*Students responding "N/A, don't drive" and "N/A don't drink" were excluded from this analysis.

Estimated Blood Alcohol Concentration (or eBAC) of college students reporting 1 or more drinks the last time they "partied" or socialized. **Students reporting 0 drinks were excluded from the analysis.** Due to the improbability of a student surviving a drinking episode resulting in an extremely high eBAC, all students with an eBAC of 0.50 or higher are also omitted from these eBAC figures. eBAC is an estimated figure based on the reported number of drinks consumed during the last time they "partied" or socialized, their approximate time of consumption, sex, weight, and the average rate of ethanol metabolism.

</table>

| Male condom use plus another method             | 37.0        | 34.6 | 35.3   |
| Any two or more methods (excluding male condoms)| 21.9        | 22.3 | 22.2   |

9.6 % of sexually active college students reported using (or reported their partner used) emergency contraception ("morning after pill") within the last 12 months.
(male: 7.6 %; female: 10.7 %).*

*Students responding "Not sexually active" were excluded from the analysis.

1.1 % of college students who had vaginal intercourse within the last 12 months reported experiencing an unintentional pregnancy or got someone pregnant within the last 12 months.
(male: 1.2 %; female: 1.0 %).**

**Students responding "Have not had vaginal intercourse within the last 12 months" were excluded from the analysis.
G. Nutrition and Exercise

College students reported usually eating the following number of servings of fruits and vegetables per day:

<table>
<thead>
<tr>
<th></th>
<th>Percent (%)</th>
<th>Male</th>
<th>Female</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 servings per day</td>

Demographics and Student Characteristics

- **Age:**
  - 18 - 20 years: 0.2%
  - 21 - 24 years: 32.2%
  - 25 - 29 years: 41.1%
  - 30+ years: 26.5%

- **Gender**
  - Female: 63.3%
  - Male: 34.8%
  - Non-binary: 1.9%

- **Student status:**
  - 1st year undergraduate: 0.0%
  - 2nd year undergraduate: 0.0%
  - 3rd year undergraduate: 0.0%
  - 4th year undergraduate: 0.0%
  - 5th year or more undergraduate: 0.0%
  - Graduate or professional: 100.0%
  - Not seeking a degree: 0.0%
  - Other: 0.0%
  - Full-time student: 84.9%
  - Part-time student: 14.1%
  - Other student: 1.0%

- **Relationship status:**
  - Not in a relationship: 37.6%
  - In a relationship but not living together: 28.8%
  - In a relationship and living together: 33.7%

- **Marital status:**
  - Single: 72.4%
  - Married/Partnered: 24.3%
  - Separated/Divorced/Other: 3.4%

- **Primary Source of Health Insurance:**
  - College/university sponsored plan: 47.5%
  - Parents’ plan: 22.6%
  - Another plan: 28.3%
  - Don’t have health insurance: 1.3%
  - Not sure if have plan: 0.4%

- **Students describe themselves as:**
  - White: 58.9%
  - Black or African American: 5.3%
  - Hispanic or Latino/a: 8.8%
  - Asian or Pacific Islander: 25.4%
  - American Indian, Alaskan Native or Native Hawaiian: 1.0%
  - Biracial or Multiracial: 3.7%
  - Other: 4.0%

- **International Student:**
  - International: 26.5%

- **Students describe themselves as:**
  - Asexual: 4.5%
  - Bisexual: 5.4%
  - Gay: 3.2%
  - Lesbian: 1.0%
  - Pansexual: 0.9%
  - Queer: 1.5%
  - Questioning: 0.9%
  - Same Gender Loving: 0.1%
  - Straight/Heterosexual: 81.6%
  - Another identity: 0.8%

- **Housing:**
  - Campus residence hall: 5.8%
  - Fraternity or sorority house: 0.1%
  - Other university housing: 10.7%
  - Parent/guardian home: 5.7%
  - Other off-campus housing: 67.5%
  - Other: 10.3%

- **Participated in organized college athletics:**
  - Varsity: 1.2%
  - Club sports: 4.5%
  - Intramurals: 8.9%

- **Member of a social fraternity or sorority:**
  - Greek member: 4.6%

* See note on page 2 regarding gender categories
Demographics of Participating Institutions
One hundred twenty four postsecondary institutions self-selected to participate in the Spring 2017 ACHA National College Health Assessment and 81,529 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 63,497 students at 92 schools. This report includes only data from 14,311 GRADUATE and PROFESSIONAL students at 67 schools. Demographic characteristics of the 67 campuses follow. Note that schools surveying in the 30 days following their Spring Break are omitted from this report.
