Demographics of Participating Institutions

One hundred sixty eight postsecondary institutions self-selected to participate in the Spring 2014 ACHA National College Health Assessment and 94,197 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 79,266 students at 140 schools. **This report includes only data from 9,570 GRADUATE/PROFESSIONAL students at 87 schools.** Demographic characteristics of the 87 campuses follow. *Note that schools surveying in the 30 days following their Spring Break are omitted from this report.*
