Demographics of Participating Institutions

One hundred forty eight postsecondary institutions self-selected to participate in the Spring 2015 ACHA National College Health Assessment and 116,432 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 93,034 students at 108 schools. **This report includes only data from 74,438 UNDERGRADUATE students at 108 schools.** Demographic characteristics of the 108 campuses follow. *Note that schools surveying in the 30 days following their Spring Break are omitted from this report.*
