Demographics of Participating Institutions

One hundred forty six postsecondary institutions self-selected to participate in the Spring 2010 ACHA National College Health Assessment and 99,170 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only those institutions that surveyed all students, or used a random sampling technique are included in the analysis, yielding a final data set consisting of 95,712 students and 139 schools. Demographic characteristics of the 139 campuses follow:
