American College Health Association

Reference Group Data Report Spring 2012

The ACHA-NCHA II supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

> Suggested citation for this document: American College Health Association. American College Health Association-National College Health Assessment II: Reference Group Data Report Spring 2012. Hanover, MD: American College Health Association; 2012.

Demographics of Participating Institutions

One hundred fifty seven postsecondary institutions self-selected to participate in the Spring 2012 ACHA National College Health Assessment and 98,050 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 90,666 students and 141 schools. Demographic characteristics of the 141 campuses follow:
