Demographics of Participating Institutions

One hundred forty eight postsecondary institutions self-selected to participate in the Spring 2011 ACHA National College Health Assessment and 116,254 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 105,781 students and 129 schools. **This report includes only data from 84,760 UNDERGRADUATE students at 129 institutions.** Demographic characteristics of the 129 campuses follow:
