Demographics of Participating Colleges/Universities

Twenty-four US postsecondary institutions self-selected to participate in the Fall 2000 National College Health Assessment and 11,577 surveys were completed by students on these campuses. For the purpose of this study, only those institutions that used a random sampling technique will be included in the analysis, yielding a final data set consisting of 10,413 students on 20 campuses. Demographic characteristics of the 20 campuses follow:
