Reference Group Data Report

Fall 2006

The ACHA-NCHA supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Demographics of Participating Colleges/Universities

Thirty eight postsecondary institutions self-selected to participate in the Fall 2006 ACHA National College Health Assessment and 25,155 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only those institutions that surveyed all students, or used a random sampling technique are included in the analysis, yielding a final data set consisting of 23,863 students and 34 schools. Demographic characteristics of the 34 campuses follow:
