American College Health Association

Reference Group Data Report

Spring 2008

The ACHA-NCHA supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Demographics of Participating Colleges/Universities

One hundred thirteen postsecondary institutions self-selected to participate in the Spring 2008 ACHA National College Health Assessment and 83,070 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only those institutions that surveyed all students, or used a random sampling technique are included in the analysis, yielding a final data set consisting of 80,121 students and 106 schools. Demographic characteristics of the 106 campuses follow:
