# **Demographics of Participating Colleges/Universities**

Thirty-five US postsecondary institutions self-selected to participate in the Spring 2000 National College Health Assessment and 19,780 surveys were completed by students on these campuses. For the purpose of this study, only those institutions that used a random sampling technique will be included in the analysis, yielding a final data set consisting of 16,024 students on 28 campuses. Demographic characteristics of the 28 campuses follow:
