

American College Health Association National College Health Assessment

Reference Group Data Report

Spring 2006

Reference Group Data Report Spring 2006

The ACHA-NCHA supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Suggested citation for this document: American College Health Association. American College Health Association-National College Health Assessment: Reference Group Data Report Spring 2006. Baltimore: American College Health Association; 2006.

Demographics of Participating Colleges/Universities

One hundred twenty three postsecondary institutions self-selected to participate in the Spring 2006 National College Health Assessment and 97,357 surveys were completed by students on these campuses. For the purpose of this study, only those institutions that used a random sampling technique or sampled a universe such as all 1st year students were included in the analysis, yielding a final data set consisting of 94,806 students and 117 schools. Demographic characteristics of the 117 campuses follow:

Public	72
Private	45

4-year	113
2-year	4

ACHA Member Institution	111
Non-member Institution	6

Carnegie Classification	
Doctoral/Research Universities	41
Extensive	
Doctoral /Research Universities	13
Intensive	
Masters Colleges and	38
Universities I and II	
Baccalaureate	16
Associate Colleges	4
