# Introduction and Notes

The ACHA-National College Health Assessment (ACHA-NCHA) is a national research survey organized by the American College Health Association (ACHA) to assist college health service providers, health educators, counselors, and administrators in collecting data about their students' habits and behaviors on the most prevalent health topics. The ACHA-NCHA now provides the largest known comprehensive data set on the health of college students, providing the college health and higher education fields with a vast spectrum of information on student health.

ACHA initiated the original ACHA-NCHA in 2000 and the instrument was used nationwide through the Spring 2008 data collection period. A revised survey, the ACHA-NCHA-II, was in use from Fall 2008 - Spring 2019 data collection periods. The survey was redesigned again, and data collection with the ACHA-NCHA III began in Fall 2019.

Please note that it is not appropriate to compare trends between versions of the survey. Directly comparing data points between the Original ACHA-NCHA, the ACHA-NCHA II, and the ACHA-NCHA III can lead to erroneous conclusions and is not recommended.

## Notes about this report:

1. Missing values have been excluded from analysis and only valid percents are included in this document, unless otherwise noted.
2. **The ACHA-NCHA III is programmed differently than earlier versions of the survey.** Rather than asking the respondents to answer every question (and offering a "not applicable" option), display logic was used throughout the survey to determine whether, based on their response to an earlier question, the student saw a follow-up question. This makes the valid percents of certain questions impossible to apply to the entire sample, as the denominator used was limited to only the number of students that saw the question. When appropriate, results are also presented using the entire sample as the denominator to show the proportion of the overall sample that experienced a particular issue. These differences in presentation are carefully noted throughout the document and will often explain differences observed between this document and the full data report. Please look carefully at descriptions of the data presented in each table, as well as any footnotes included.
3. **About the use of sex and gender in this report:** Survey responses are reported by sex based on the responses to questions 67A, 67B, and 67C. For the purpose of the ACHA-NCHA report documents, respondents are reported as male or female only when their responses to these three questions are consistent with one another. If gender identity is consistent with sex at birth AND "no" is selected for transgender, then respondents are designated as either *male* or *female*. If respondents select "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as *non-binary*. A respondent that selects "intersex" for sex at birth, "no" for transgender, and man or woman for gender identity are designated as *male* or *female*. A respondent that selects "intersex" for sex at birth, "yes" for transgender, or selects a gender identity other than man or woman are designated as *non-binary*. A respondent that skips any of the three questions is designated as *unknown*. Totals displayed in this report include non-binary and unknown responses.

For additional information about the survey's development, design, and methodology, email Mary T Hoban, PhD, MCHES, (mhoban@acha.org), Christine Kukich, MS (ckukich@acha.org), or visit [www.acha-ncha.org](http://www.acha-ncha.org).

This Executive Summary highlights results of the ACHA-NCHA III Fall 2020 survey for Undergraduate Student Reference Group consisting of 8,851 respondents.

The response rate was 13.9%.

# Findings

## A. General Health and Campus Climate

- 58.1 % of college students surveyed ( 65.6 % male and 56.5 % female) described their health as *very good or excellent*.
- 89.8 % of college students surveyed ( 92.0 % male and 89.7 % female) described their health as *good, very good or excellent*.

Proportion of college students who reported they *agree* or *strongly agree* that:

	Percent (%)	Male	Female	Total
I feel that I belong at my college/university		70.1	71.9	70.8
I feel that students' health and well-being is a priority at my college/university		61.1	61.3	60.7
At my college/university, I feel that the campus climate encourages free and open discussion of students' health and well-being.		60.9	62.4	61.4
At my college/university, we are a campus where we look out for each other		54.2	57.2	55.7

## B. Nutrition, BMI, Physical Activity, and Food Security

College students reported:

	Percent (%)	Male	Female	Total
Drinking 0 sugar-sweetened beverages (per day), on average, in the last 7 days		29.5	29.8	29.5
Drinking 1 or more sugar-sweetened beverages (per day), on average, in the last 7 days		70.5	70.2	70.5
Drinking energy drinks or shots on 0 of the past 30 days		72.8	79.9	77.8
Drinking energy drinks or shots on 1-4 of the past 30 days		15.6	11.9	13.0
Drinking energy drinks or shots on 5 or more of the past 30 days		11.6	8.2	9.2
Eating 3 or more servings of fruits (per day), on average, in the last 7 days		17.7	18.0	17.8
Eating 3 or more servings of vegetables (per day), on average, in the last 7 days		29.1	30.1	29.7

■ **Estimated Body Mass Index (BMI):** This figure incorporates reported height and weight to form a general indicator of physical health. Categories defined by The World Health Organization (WHO) 2000, reprinted 2004. Obesity: Preventing and Managing the Global Epidemic. WHO Tech Report Series: 894.

BMI	Percent (%)	Male	Female	Total
<18.5 Underweight		5.8	5.2	5.4
18.5-24.9 Healthy Weight		49.9	56.3	54.3
25-29.9 Overweight		28.9	21.1	23.3
30-34.9 Class I Obesity		9.5	9.6	9.7
35-39.9 Class II Obesity		3.8	4.0	4.1
≥40 Class III Obesity		2.0	3.7	3.4

## Students meeting the recommended guidelines for physical activity

Based on: US Dept of Health and Human Services. *Physical Activities Guidelines for Americans*, 2nd edition.

Washington, DC: US Dept of Health and Human Services; 2018

### Definitions:

- Recommendation for **aerobic activity**: 150 minutes or more of moderate-intensity physical activity per week or 75 minutes of vigorous-intensity physical activity or the equivalent combination
- Recommendation for **strength training**: 2 or more days a week of moderate or greater intensity activities that involve all major muscle groups
- **Active Adults** meet the recommendation for strength training **AND** aerobic activity
- **Highly Active Adults** meet the recommendation for strength training and **TWICE** the recommendation for aerobic activity (300 minutes or more of moderate-intensity physical activity per week or 150 minutes of vigorous-intensity physical activity or the equivalent combination)

	Percent (%)	Male	Female	Total
Guidelines met for <b>aerobic exercise only</b>		70.2	63.1	64.5
Guidelines met for <b>Active Adults</b>		47.0	35.1	37.8
Guidelines met for <b>Highly Active Adults</b>		37.7	26.7	29.2

## Food Security

Based on responses to the *US Household Food Security Survey Module: Six-Item Short Form (2012)*

from the USDA Economic Research Service.

	Percent (%)	Male	Female	Total
High or marginal food security (score 0-1)		63.8	59.9	60.5
Low food security (score 2-4)		21.6	23.7	23.3
Very low food security (score 5-6)		14.6	16.4	16.2
<b>Any food insecurity</b> (low or very low food security)		36.2	40.1	39.5

## C. Health Care Utilization

### College students reported:

	Percent (%)	Male	Female	Total
Receiving psychological or mental health services within the last 12 months		18.6	29.8	27.7

\*The services were provided by:

My current campus health and/or counseling center	41.3	38.7	39.9
A mental health provider in the local community near my campus	19.8	22.6	22.3
A mental health provider in my home town	50.1	53.7	52.6
A mental health provider not described above	11.2	8.1	8.7

\*Only students who reported receiving care in the last 12 months were asked these questions

	Percent (%)	Male	Female	Total
Visiting a medical provider within the last 12 months		55.1	71.6	67.4

\*The services were provided by:

My current campus health center	23.7	22.7	23.0
A medical service provider in the local community near my campus	26.3	25.7	25.9
A medical service provider in my home town	80.0	81.9	81.2
A medical service provider not described above	6.9	5.2	5.6

\*Only students who reported receiving care in the last 12 months were asked these questions

### College students reported:

	Percent (%)	Male	Female	Total
Flu vaccine within the last 12 month		51.1	56.5	55.0
Not starting the HPV vaccine series		18.7	16.0	16.5
Starting, but not completing HPV vaccine series		4.0	6.0	5.5
Completing HPV vaccine series		44.6	56.9	53.6
Not knowing their HPV vaccine status		32.7	21.1	24.4
Ever having a GYN visit or exam (females only)			47.9	
Having a dental exam in the last 12 months		68.7	73.2	71.6
Being tested for HIV within the last 12 months		7.2	10.8	9.9
Being tested for HIV more than 12 months ago		6.4	8.1	7.8
Wearing sunscreen usually or always when outdoors		16.6	37.2	31.4
Spending time outdoors with the intention of tanning at least once in the last 12 months		39.6	65.3	57.6

## D. Impediments to Academic Performance

Respondents are asked in numerous places throughout the survey about issues that might have negatively impacted their academic performance within the last 12 months. This is defined as negatively impacting their performance in a class or delaying progress towards their degree. Both types of negative impacts are represented in the figures below. Please refer to the corresponding Data Report for specific figures on each type of impact. **Figures in the left columns** use all students in the sample as the denominator. **Figures in the right columns** use only the students that experienced that issue (e.g. students who used cannabis, reported a problem or challenge with finances, or experienced a particular health issue) in the denominator. (items are listed in the order in which they appear in the survey)

	Percent (%)	Negatively impacted academic performance among <u>all students in the sample</u>			Negatively impacted academic performance among <u>only students that experienced the issue</u>		
		Male	Female	Total	Male	Female	Total
Alcohol use		2.0	1.4	1.5	3.1	1.9	2.2

*\*Students were instructed to include medical and non-medical use of cannabis.*

**Driving under the influence**

- 10.5 % of college students reported driving after having **any alcohol** in the last 30 days.\*  
*\*Only students who reported driving in the last 30 days and drinking alcohol in the last 30 days were asked this question.*
- 32.7 % of college students reported driving within 6 hours of using cannabis/marijuana in the last 30 days.\*  
*\*Only students who reported driving in the last 30 days and using cannabis in the last 30 days were asked this question.*

**Estimated Blood Alcohol Concentration** (or eBAC) of college students. Due to the improbability of a student surviving a drinking episode resulting in an extremely high eBAC, all students with an eBAC of 0.50 or higher are also omitted from these eBAC figures. eBAC is an estimated figure based on the reported number of drinks consumed during the last time they drank alcohol in a social setting, their approximate time of consumption, sex, weight, and the average rate of ethanol metabolism. Only students who reported drinking alcohol within the last 3 months answered these questions.

### Demographics of Participating Institutions

Twenty three postsecondary institutions self-selected to participate in the Fall 2020 ACHA National College Health Assessment and 14,414 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique, and used the ACHA-NCHA III (currently only offered as a web survey) are included in the analysis, yielding a final data set consisting of 13,373 students at 22 schools. **This report includes only data from 8,851 UNDERGRADUATE students at 22 schools.** Demographic characteristics of the 22 campuses follow.
