

NATIONAL COLLEGE HEALTH ASSESSMENT

UNDERGRADUATE STUDENT Reference Group*

Data Report

Spring 2020

***Due to the COVID-19 pandemic, schools that began data collection after March 16, 2020 were not included in the reference group**

The ACHA-NCHA III supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Demographics of Participating Institutions

One hundred six postsecondary institutions self-selected to participate in the Spring 2020 ACHA National College Health Assessment and 69,004 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique, and used the ACHA-NCHA III (currently only offered as a web survey) are included in the analysis, yielding a final data set consisting of 50,307 students at 75 schools. **This report includes only data from 39,602 UNDERGRADUATE students at 75 schools.** Demographic characteristics of the 75 campuses follow.

FREQUENCY REPORT

Number of Surveys (n) =

39602 Web Surveys

Frequency tables are presented for every multiple choice and select all that apply questions from the survey. The mean, median, standard deviation, minimum, and maximum values are provided for the variables that are continuous, as well as those scales within the survey that produce a score.

Space for value labels associated with each response option is limited in this document and are often abbreviated for brevity. Furthermore, response options are listed in numeric order within the frequency tables, which may differ from the way they appear to students in the survey. **Please always refer to the survey codebook rather than this report document for the exact wording of survey questions and the associated response options.**

A note about the use of sex and gender in this report:

Survey responses are reported by sex based on the responses to questions 67A, 67B, and 67C. For the purpose of the ACHA-NCHA report documents, respondents are reported as male or female only when their responses to these three questions are consistent with one another. If gender identity is consistent with sex at birth AND "no" is selected for transgender, then respondents are designated as either male or female. If respondents select "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as non-binary. A respondent that selects "intersex" for sex at birth, "no" for transgender, and man or woman for gender identity are designated as male or female. A respondent that selects "intersex" for sex at birth, "yes" for transgender, or selects a gender identity other than man or woman are designated as non-binary. A respondent that skips any of the three questions is designated as unknown. Only 3 of the 4 categories are displayed in this report. Respondents categorized as non-binary are included in the Total column, but are not presented in a separate column. When the Total of any given row is higher than the sum of the male, female, and unknown respondents, the difference can be attributed to non-binary respondents that selected the response option presented in that row.

Due to the improbability of a student surviving a drinking episode resulting in an extremely high BAC, all students with a BAC of .50% or higher are omitted from the BAC figures in this report. BAC is an estimated figure based on the reported number of drinks consumed during the last time they drank alcohol in a social setting, their approximate time of consumption, sex, weight, and the average rate of ethanol metabolism. The BAC variable has only been altered for this report, and remains unchanged in the data file.

*ACHA discontinued the practice of reporting moderate psychological distress in fall 2023 due to lack of consensus on an appropriate cut off score. Instead, we recommend reporting only students who screen (or negative) for serious psychological distress as indicated above. All reference group reports were updated to reflect this change.
