

NATIONAL COLLEGE HEALTH ASSESSMENT

GRADUATE/PROFESSIONAL STUDENT Reference Group

Data Report Spring 2021

The ACHA-NCHA III supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

AMERICAN COLLEGE HEALTH ASSOCIATION

Demographics of Participating Institutions

One hundred forty-three postsecondary institutions self-selected to participate in the Spring 2021 ACHA National College Health Assessment and 98,378 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique, and used the ACHA-NCHA III (currently only offered as a web survey) are included in the analysis, yielding a final data set consisting of 96,489 students at 137 schools. **This report includes only data from 24,252 GRADUATE and PROFESSIONAL students at 112 schools.** Demographic characteristics of the 112 campuses follow.

Demographical Characteristics of the 112 US Postsecondary Institutions Included in the Spring 2021 ACHA-NCHA III GRADUATE Reference Group	
Campus Characteristic	<i>n</i>
Type of Institution	
Public	93
Private	19
2-year	4
4-year or above	108
Location of Campus	
Northeast (CT, ME, MA, NH, NJ, NY, PA, RI, VT)	9
Midwest (IL, IN, IA, KS, MI, MN, MO, NE, ND, OH, SD, WI)	23
South (AL, AR, DE, DC, FL, GA, KY, LA, MD, MS, NC, OK, SC, TN, TX, VA, WV)	14
West (AK, AZ, CA, CO, HI, ID, MT, NV, NM, OR, UT, WA, WY)	66
Campus Size	
< 2,500 students	16
2,500 – 4,999 students	6
5,000 – 9,999 students	22
10,000 – 19,999 students	27
20,000 students or more	41
Campus Setting	
Very large city (population over 500,000)	24
Large city (population 250,000-499,999)	14
Small city (population 50,000-249,999)	51
Large town (population 10,000-49,999)	16
Small town (population 2,500-9,999)	6
Rural community (population under 2,500)	1
Carnegie Classification	
Associates Colleges	4
Baccalaureate Colleges	4
Baccalaureate/Associates Colleges	1
Masters Colleges and Universities	42
Doctoral Universities	58
Special Focus Institutions	2
Miscellaneous/Not Classified	1

Demographical Characteristics of the 112 US Postsecondary Institutions Included in the Spring 2021 ACHA-NCHA III GRADUATE Reference Group

Campus Characteristic	<i>n</i>
ACHA Membership Status	
Institutional Member	97
Nonmember	15
Religious Affiliation	
No	104
Yes	8
<u>If yes:</u>	
Catholic	4
Protestant or Other Christian	4
Postsecondary Minority Institution (US Department of Education)	
No	81
Yes	31
<u>*If yes:</u>	
Postsecondary Minority Institution	0
Historically Black College or University (HBCU)	0
High Hispanic Enrollment	4
Hispanic-serving Institution (HSI)	26
Tribal College or University	1
Predominately Black Institution	0
Asian American and Native American Pacific Islander-serving	17
Alaska Native-serving or Native Hawaiian-serving Institution	2
Native American-serving Nontribal Institution	2

GRADUATE STUDENTS	Spring 2021 Institutions
Number of institutions	112
Number of students	24,252
Mean response proportion*	12%
Median response proportion*	10%

*Calculation of response proportion is based all students surveyed at the institution, and not limited to only undergraduate student responses.

We need to draw your attention to an important change in your ACHA-NCHA Report documents. Beginning in Spring 2021, responses for transgender and gender-nonconforming students are readily available directly in the report documents. This represents an important change in the way we have been reporting ACHA-NCHA results. We've prepared the following information to better explain the specific changes, our reasoning for doing so, and tips for using these redesigned report documents.

I. What we've done to date

- The ACHA-NCHA has asked respondents about their gender identity for 12 years.
- Data on transgender and gender-nonconforming (TGNC) students was available in the data file, but not displayed explicitly in the report documents in an effort to protect the privacy of TGNC students, particularly those students in smaller campus environments and at schools that publicly shared their ACHA-NCHA report documents.
- We have been trying to find the right balance between protecting students' privacy and making the results accessible to campus surveyors who may not use the statistical software that would be required to extract this information directly from the data files. Until now, we've erred on the side of protecting student privacy.

II. Why change?

- The number of TGNC students in our samples has been increasing over the years. Between 2008 and 2015, the number of students identifying as TGNC was very small (less than 0.05%). We've learned over the years that gender identity is complex and fluid. To better capture this complexity, we began asking separate questions about sex at birth and gender identity in Fall 2015. Now TGNC students tend to represent 3-4% of the overall sample.
- With greater number of students identifying as TGNC on the ACHA-NCHA in recent years, we have a better opportunity to understand their needs and behaviors than we have in years past.
- A number of health disparities between TGNC students and their cisgender peers have been well documented[1], and schools need readily available access to this data in order to better address the needs of TGNC students.

III. What's different about the way we are reporting?

- First – a note about how we have been reporting ACHA-NCHA results to date. RSEX is a variable we create based on the responses to the questions on sex at birth, whether or not a student identifies as transgender, and their gender identity. The RSEX variable had allowed us to sort respondents into 4 groups for reporting purposes: male, female, non-binary, and missing. (Details about this variable can be found in all report documents.)
- The value labels for RSEX have been revised to better represent gender identity rather than sex. A value of "1" has been changed from "Male" to "Cis Men[2]." A "2" has been changed from "Female" to "Cis Women[3]." The value "3" has been changed from "non-binary" to "Transgender and Gender-Nonconforming" (TGNC), as it's a more accurate and inclusive term. The value "4" on RSEX remains "missing/unknown" and is used for students who do not answer all three questions.
- The "missing/unknown" column in the Data Report document has been replaced with a "Trans/Gender-Nonconforming" column. Because space limitations in the report prevent us from displaying all 4 categories plus a total column in the same document, it's now the "missing/unknown" column that is not displayed. Now when the Total of any given row is higher than the sum of the cis men, cis women, and TGNC respondents, the difference can be attributed to "missing/unknown" respondents that selected the response option presented in that row.
- A column for "Trans/Gender-Nonconforming" has been added the Executive Summary Report document.

IV. Important considerations with this new format

- Percentages in the Executive Summary may represent a very small number of TGNC students and can limit the generalizability of a particular finding. To assist with the interpretation of the percentages displayed in the Executive Summary, the total sample size for each group has been added to every page.
- We encourage ACHA-NCHA surveyors to carefully review their report documents, particularly among the student demographic variables, and consider students who may be inadvertently identified in the results based on a unique combination of the demographic characteristics before sharing the documents widely or publicly. This is especially true for very small schools, as well as schools that lack diversity in the student population.
- Think about the implication of working with and documenting very small samples – from the perspective of making meaningful interpretations, as well as the privacy of respondents. This is true of all demographic variables, and not limited to gender identity. You may consider a minimum cell size or another threshold by which you make decisions about making your Institutional Data Report publicly available. It is less of a concern in your Institutional Executive Summary as we only display the percentages with the overall sample size.

Questions about this report? Please reach out to Christine Kukich at Ckukich@acha.org

[2] Cisgender refers to people whose gender identity matches their sex assigned at birth. Cis men is short for "cisgender men" and is a term used to describe persons who identify as men and were assigned male at birth.

[3] Cis women is short for "cisgender women" and is a term used to describe persons who identify as women and were assigned female at birth.

FREQUENCY REPORT

Number of Surveys (n) = 24252 Web Surveys

Frequency tables are presented for every multiple choice and select all that apply questions from the survey. The mean, median, standard deviation, minimum, and maximum values are provided for the variables that are continuous, as well as those scales within the survey that produce a score.

Space for value labels associated with each response option is limited in this document and are often abbreviated for brevity. Furthermore, response options are listed in numeric order within the frequency tables, which may differ from the way they appear to students in the survey. **Please always refer to the survey codebook rather than this report document for the exact wording of survey questions and the associated response options.**

A note about the use of sex and gender in this report:

Survey results are reported by sex based on the responses to questions 67A, 67B, and 67C. The responses to these questions are used to create a new variable called RSEX. RSEX is used for organizing results in the ACHA-NCHA report documents. Respondents are reported as cis men or cis women only when their responses to 67A, 67B, and 67C are consistent with one another. If gender identity is consistent with sex at birth AND "no" is selected for transgender, then respondents are designated as either cis men or cis women in RSEX. If respondents select "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as transgender/gender non-conforming in RSEX. A respondent that selects "intersex" for sex at birth, "no" for transgender, and man or woman for gender identity are designated as cis men or cis women in RSEX. A respondent that selects "intersex" for sex at birth, "yes" for transgender, or selects a gender identity other than man or woman are designated as transgender/gender non-conforming in RSEX. A respondent that selects "another identity" on 67C is designated missing in RSEX. A respondent that skips any of the three questions is designated as missing in RSEX. Totals displayed in this report include missing responses. Please see the ACHA-NCHA III survey codebook for more information about how data on sex and gender are coded. Please note: if your data contain a small number of transgender and gender non-conforming students, we advise you to take caution in sharing this report, as these students' responses may make it possible to identify who they are.

1) How would you describe your overall health?

	Cis Men		Cis Women		Trans/Gender Non-conforming		Total	
	Freq.	Pct.	Freq.	Pct.	Freq.	Pct.	Freq.	Pct.

Due to the improbability of a student surviving a drinking episode resulting in an extremely high BAC, all students with a BAC of .50% or higher are omitted from the BAC figures in this report. BAC is an estimated figure based on the reported number of drinks consumed during the last time they drank alcohol in a social setting, their approximate time of consumption, sex, weight, and the average rate of ethanol metabolism. The BAC variable has only been altered for this report, and remains unchanged in the data file.

*ACHA discontinued the practice of reporting moderate psychological distress in fall 2023 due to lack of consensus on an appropriate cut off score. Instead, we recommend reporting only students who screen positive (or negative) for serious psychological distress as indicated above. All reference group reports were updated to reflect this change.
